

108. Scribbles

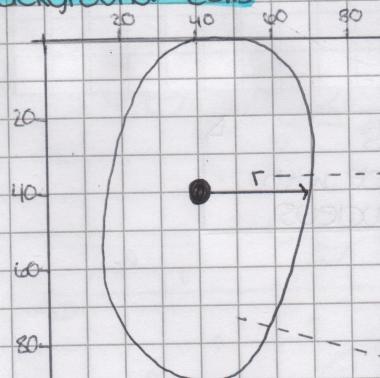

Virus: Scribbles

Background - pattern

Background - color:
lightblue / lightgrey

Background - cells

r = random in dependency
of min- and max-radius

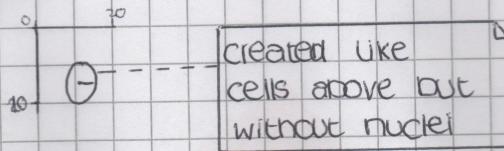

color: add opacity between
33 and 55 to hex-color

maybe add
pattern to
imitate
granulation?

start-point:
-xPos &
-yPos
(randomized)

Since the cells in the foreground are from
the same cell tissue, they look the same,
they are just bigger

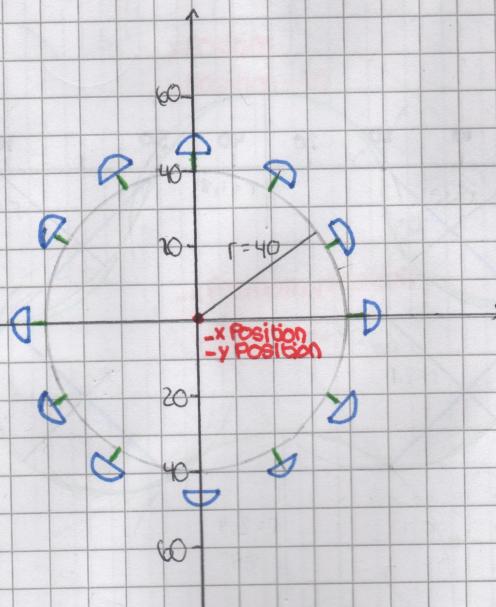

particles

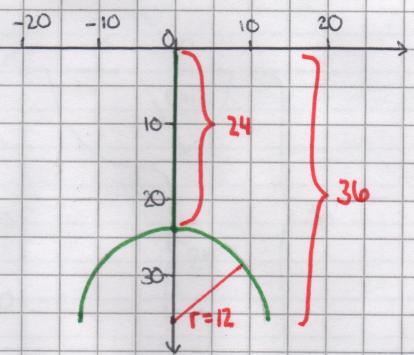

created like
cells above but
without nuclei

corona - Virus

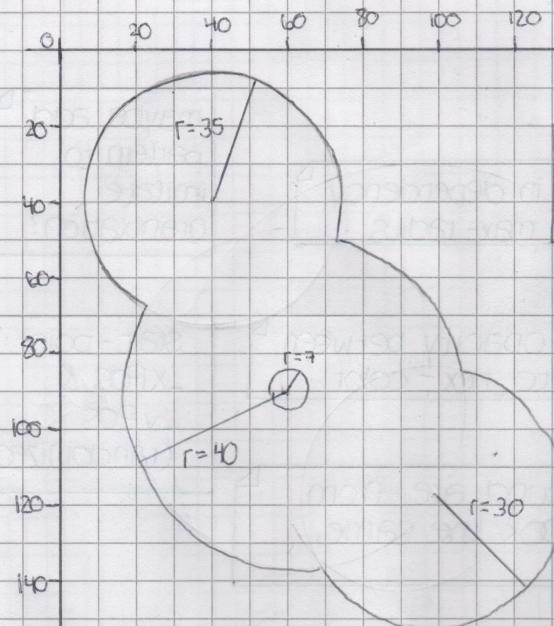

1 big circle
8 small circles

Antibody

Makrophage

3 big circles
1 small circle with
 $r = 7$ for nucleus
